

UPDATED FOR MY2017-2018

## Your network by bike

Gates has designed an attractive and lightweight belt drive system specifically for higher volume urban bicycle models:

- Advanced carbon fiber reinforced elastomeric belt incorporates CenterTrack design for improved alignment
- Pre-engineered crankset assembly options with composite front sprockets
- NEW economical composite sprocket

## Recommended for

- City and Urban bikes
- eBikes with front or rear hub motors;
- Not approved for mid motor eBikes, trekking, or off-road use.\*

## Forged 6061-T6 Alloy Cranksets
