

## enviolo 22T Sprocket Compatibility

Gates Carbon Drive now offers a 22T enviolo sprocket (CT1122VMN). enviolo hubs produced in August 2018 or later utilize a revised dust cover that allows fitment of the 22T sprocket.

To verify compatibility, check the enviolo serial number. All hubs with a serial number starting with 808 or higher are compatible with the Gates CT1122VMN sprocket.

For the enviolo City, Commercial, and Trekking groupsets, the serial number is engraved into the axle flats. For enviolo Cargo and Sportive groupsets, the serial number is engraved in one of the pockets located below the spoke holes.

*Serial number engraved on axle flat.*

*Serial number engraved in pocket.*
