

SHIMANO 3-SPEED NEXUS HUB MODELS SG-3D55 & SG-3R40

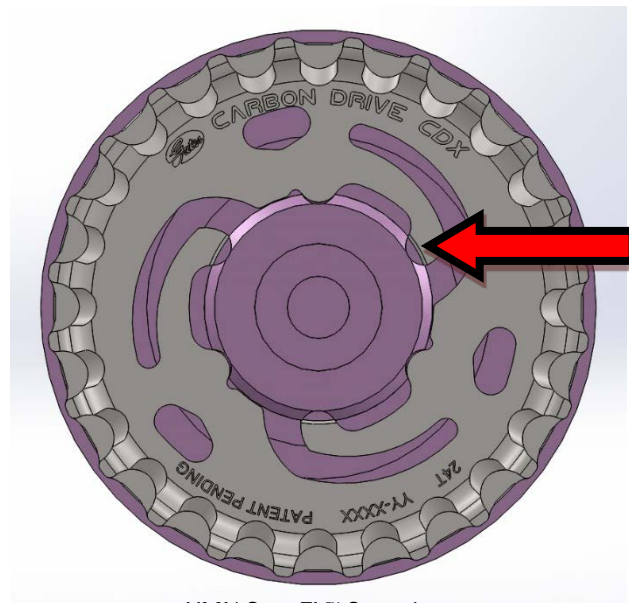

For the Shimano® 3-speed hubs SG-3D55 and SG-3R40, the only compatible Carbon Drive sprockets are the NMN series sprockets. The SG-3D55 and SG-3R40 hubs differ from the other 3-speed Shimano hubs in that the sprocket driver is a 6-lobe pattern instead of the standard 3-lobe pattern.

The XMN/XMN-U & XSE/XSE-U SureFit™ sprockets are not compatible with either the SG-3D55 or the SG-3R40 because the SureFit fingertip does not contact the hub driver, resulting in a loose fit.

The NMN sprockets only have 3-lobes, but are fully supported on the hub driver resulting in proper fit and operation.

NMN 3-Lobe Sprocket
Approved fit for SG-3D55 & SG-3R40 hubs.

XMN SureFit™ Sprocket
Not compatible with SG-3D55 or SG-3R40 hubs.

**Approved Sprockets
for SG-3D55 and SG-3R40**

CT1122NMN	22 tooth
CT1124NMN	24 tooth

**Not Compatible
with SG-3D55 or SG-3R40**

Any "XMN", "XMN-U", "XSE", & "XSE-U" rear sprockets.
