Bosch Design Cover Requirements for MY23

The following BES3 Bosch drive systems have interference with Gates Carbon Drive belt systems starting in MY23:

MY23 Active Line	BDU310 / BDU330
MY23 Active Line Plus	BDU350 / BDU380
MY23 Performance Line / Performance Line Sport	BDU336Y / BDU338Y

Gates recommends customers specify the previous generation MY22 (BES2) Performance Line design covers shown below.

Design Cover Performance Line Front (Black)	1270.015.251
Design Cover Performance Line Right (Black)	1270.015.252
Design Cover Performance Line Left (Black)	1270.015.253
Fixing Screw for Design Cover M4x53.5 for BDU3YY	1270.016.420
Fixing Screw for Cable Protector M4x10	1270.016.431
Logo Bezel - Specify Bosch Bezel Appropriate to System	

When ordering BES2 Performance Line covers, please work with your Bosch representative to discuss planned volume of BES2 covers needed for additional model years, to ensure continued production support.

Note that the Bosch Connect Module (BCM) cannot be located inside the BES2 cover. If integration with the BCM is desired on the drive systems listed above, custom designed covers will be required.

For questions on integration, please contact Gates at info@carbondrive.net
